Board members were provided two identical proposals from Cincinnati Bell and Time Warner Cable for the development of a point to point connection from the 5963 Boymel Drive office to the Butler County Information Services Department located at 315 High Street in Hamilton, Ohio. This "county pipeline" will allow the Board to experience the benefits of a 100 MB internet connection.

Once connected, the majority of the Board's IT services can be maintained and serviced by BCIS including offsite backups, antivirus software, wifi, all SSL certificates, DNS services, spam and firewall services, etc.

Board members were provided a brief cost analysis of what the Board is currently paying for these services compared to the establishment of the pipeline. It was noted that both the Cincinnati Bell and
Time Warner proposals will take 60 - 90 days to develop the connection. The Board will need to maintain current services until the connection is physically established so cost savings will not occur before that time.

If approved, the Executive Director will seek recommendation from the Butler County IT Services department as to which vendor should be selected to accomplish this project.

The sale is contingent upon the satisfactory results of a financial audit of Sojourner. The process to be followed for the sale involves

1) the consolidation by the State of Ohio Mental Health and Addiction Services of the two remaining forgivable mortgages on the property into one mortgage
2) the completion of a contract, mortgage, and note for a new consolidated mortgage with the Board for 30 years for the remaining balance of the mortgages (approximately $277,000)
3) completion of an Assumption and Waiver by Sojourner Recovery Services in order to assume the new 30 year forgivable mortgage and
4) payment by Sojourner to the Board of the difference between the appraised price of the property ($435,000) less the amount remaining on the mortgages ($277,000) = approximately $155,000.
